SC-303 & SC-313

Coin counters

With counting speeds up to 2,700 coins/minute, the SC-303 and SC-313 are real time-savers. Reliable partners for banking, retail, amusement and other businesses that need to count, verify or bag coins or plastic tokens. The products are so compact that they will fit in wherever you need to use them.

Long-lasting coin counters SC-303 & SC-313

The difference between SC-303 and SC-313

Even though the two products are very similar in looks and functions, there are some differences. SC-303 comes with a carrying handle for easy portability. On SC-313 the tilting coin tray has been replaced with an automatic coin hopper. The remarkably higher hopper capacity makes SC-313 the ideal choice for larger volumes.

Universal counting, verifying or bagging

Two separate adjustments for coin diameter and coin thickness make the SC-303 and SC-313 a universal choice. A side bag attachment for rejected coins is standard for both products. Other benefits for the user are pre-selectable bag stops, memory, automatic reverse function removing jammed coins and automatic stop and offsort function for smaller coins. Accessories include e.g. tubing attachment and bag holder for rejected coins.

Straightforward efficiency

The SC-303 and SC-313 are easy to use and handle. In addition to accuracy and speed, the electronic counting gives a very low sound level, which is appreciated in open areas. Thanks to their compact size, they will both fit in wherever you need them, and can easily be moved around. In short, SC-303 or SC-313 is the ideal solution if you need a fast and reliable coin counter.

Loaded with customer benefits

Microprocessor controlled with non-volatile memory for storing all vital data – no battery backup required. Three memory levels with a sub-total, grand total and a separate bag count memory. Pre-programmed stops, up to 7 different values, with manual override, from 1-10,999 and infinitely. Easy to read six-digit green LED display.

CS-313 Technical Specification

Speed	up to 2700 coins/min
Hopper capacity	approx. 3000 coins (3 litres)
Diameter range	14-34 mm
Thickness range	1.0-3.4 mm
Size (width×depth×height)	260 mm × 370 mm × 315 mm
Weight	11,6 kg
Voltage	100-130/220-240 V, 60/50 Hz
Power	55 W

CS-303 Technical Specification

Speed	up to 2700 coins/min
Hopper capacity	approx. 1700 coins (2 litres)
Diameter range	14-34 mm
Thickness range	1.0-3.4 mm
Size (width×depth×height)	220 mm × 370 mm × 165 mm
Weight	8,4 kg
Voltage	100-130/220-240 V, 60/50 Hz
Power	40 W
